

SIMPLY INDISPENSABLE PRIVILEGED ACCOUNT PASSWORD SECURITY

THE CHALLENGE

Privileged account passwords for domain admin accounts, root accounts, superuser accounts and more are the preferred targets for hackers these days. Once compromised, these privileged credentials give attackers the “keys to the kingdom,” allowing them to gain access as a trusted user to your most sensitive and critical information.

Unfortunately, these privileged accounts are all too often unknown, unmanaged, and unprotected. If they are not properly managed and secured, your organization could suffer disastrous consequences.

OUR SOLUTION

As the global leader of next-generation IT security solutions, Thycotic protects organizations against cyber-attacks that use privileged accounts to strike at the core of the enterprise. Thycotic Secret Server delivers an indispensable, comprehensive Privileged Account Management (PAM) solution to protect your most valuable information assets from cyber attacks and insider threats.

Unlike any other security offering, Thycotic Secret Server ensures the protection of privileged accounts while being the fastest to deploy, easiest to use, scalable enterprise-class solution offered at a competitive price. Already securing privileged account access for more than 3,000 organizations worldwide, including Fortune 500 enterprises, Thycotic Secret Server is simply your best value for PAM protection.

 Our IT admins were able to get up to speed within minutes and our control over privileged accounts improved immediately. Because Secret Server helps us manage sensitive credentials across privileged accounts, we no longer face the inefficiencies and security risks that can plague an organization as big as ours.

Michael Boeglin

Director of Global Infrastructure – International Rescue Committee

OUR INNOVATIVE PRODUCTS

-  **Thycotic Secret Server**
Creates a fundamental security layer – managed from a single console – to protect against cyber attacks that use privileged accounts to strike at the core of the enterprise.
-  **Password Reset Server**
Provides simple, self-service password management to free up IT help desk staff from time-consuming and inefficient processes, and enforces stronger end-user password controls.
-  **Group Management Server**
Empowers non-IT personnel to securely manage their department’s Active Directory Groups without assigning them a privileged account.

WHAT WE DO	HOW YOU BENEFIT
<p>Discover & Store Privileged Accounts</p> <p>Automatically identify and securely store privileged accounts.</p>	<ul style="list-style-type: none"> • Easily detect all privileged accounts and store the passwords in our secure vault. • Accomplish in minutes what would take countless IT hours.
<p>Manage & Audit Privileged Accounts</p> <p>Audit, analyze, and manage privileged user and account activity.</p>	<ul style="list-style-type: none"> • Automatically rotate passwords to manage the keys to the kingdom. • Alerts your team to abnormal use of credentials. • Dramatically improves your security posture. • Facilitates adherence to compliance standards.
<p>Monitor & Control Privileged Accounts</p> <p>Collect, record, monitor, and manage privileged activity.</p>	<ul style="list-style-type: none"> • Know how your privileged accounts are being used and deter abuse. • Provide full view to your SOC with SIEM integration of privileged account use. • Log non-repudiation evidence for auditors through active recording & monitoring.

KEY CUSTOMER BENEFITS

Simply Secure – Multiple layers of built-in security with easy access management for IT admins, robust segregation of role-based duties, and military-grade AES 256 bit encryption.

Highly Scalable – Supports large-scale distributed environments, all major OS, DB, apps, hypervisors, network devices, and security appliances, for on-premise and cloud.

Always Available – Delivers high availability disaster recovery options, as well as hot backups, database mirroring and our unique unlimited admin mode for “break-the-glass” scenarios.

Readily Customizable – Easy to customize without any need to spend time or money to hire expensive consultants.

Faster & Easier – Software installs in minutes, is easy to use and flexible so you can get tasks done with minimal effort.

Auditable Too – Out-of-the-box and custom reports satisfy security regulations with minimal effort.
