

# Image-based Backups to the Cloud

## The Intronis Appliance Backup Solution from Barracuda

### Overview

The Intronis Appliance Backup Solution from Barracuda gives MSPs a simplified platform for offering virtual machine (VM) and physical server image protection – including bare metal restore (BMR) – via the cloud.

### Safeguard Against Localized Failures and Sitewide Disasters

Integrated, all-in-one appliance coupled with cloud-based BCDR simplifies cloud-enabled image backup and restore service delivery for SMBs. Key features include:

**Cloud-based Bare Metal Restore:** Restore complete server images from appliances for the cloud.

**Physical-to-Virtual (P2V) Restores:** Quickly restore business-critical servers onto virtual machines.

**LiveBrowse:** Recover files or folders quickly from Microsoft Hyper-V or VMware images without mounting VMs.

**Revision-level Recovery:** Search and restore specific files and revisions intuitively.

**Cloud LiveBoot for VMware:** Maximize application availability with the ability to spin up and run VMware VMs directly from the Barracuda cloud.

### Key Solution Advantages

#### Efficient cloud-enabled business continuity and disaster recovery (BCDR)

- Fast failover for VMware VMs from either local or cloud images to recover from sitewide outages or SAN failures
- Global, inline deduplication for fast, efficient backups and restores of server and VM image data
- Centralized management for seamless multi-site administration

### The Intronis Partnership Model

The Intronis Appliance Backup Solution from Barracuda is available on an affordable, monthly, fixed-price basis per SMB

*Intronis MSP Solutions by Barracuda combines security and backup solutions tailored specifically for managed service providers. Intronis helps MSP partners grow and succeed, protecting SMB files, folders, email, applications, servers and networks — both locally and in the cloud — through a single pane of glass.*
